Additional Product Information

Product features

2-wire video intercom / hands-free WiFi with integrated Amazon Alexa voice assistant, 5" LCD vertical touch screen and video intercom answering machine. Equipped with a push button for the opening of the lock and capacitive pushbuttons for the control of the main functions of the video intercom: hands-free communication, auto-ignition of the outer plate / cycle of the cameras and favorite push button (configurable to activate the quick action that the user uses most often - for example, additional locks, turning on the stair light, intercom). LED signage for: WiFi network connection status, information/notifications and call exclusion. You can interact with the integrated Alexa voice assistant through the buttons on the touch screen or by voice to activate functions such as the video intercom, Smart Home, routines, reminders, etc. Through the touch screen, you can access the list of notifications, favorite functions of the video intercom, security and Smart Home (if present). Possibility of voice communication with the concierge switchboard (if it exists in the system) after making the call. The device must be configured by physically inserting the configurators or from the menu, which offers greater possibilities for customizing functions and associated texts. Thanks to the WiFi connection, the video intercom can be associated with the Home + Security application (available for Android and iOS). This application allows you to use the main functions of the v...
