High performance fan heater with a high heating capacity

The large amount of heat generated by the optimised sized heater is distributed within the enclosure using forced air, produced by the heater's fan

When installed, water condensation will be avoided especially in situations when the ambient temperature dramatically drops

As the air will be distributed by the integrated fan, hot spots within the enclosure will be prevented

A thermostat with a normally closed contact, ETR or EFR, is recommended in order to control the heater

Voltage (V): 230 V AC 50/60 HZ

Protection: IP 20, Class I (earthed)
