Additional Product Information

Lapp Group offers a cable conveying system for both flat and round cables.
Space-saving fixation, since there is no lateral displacement with respect to the beam proceeds
Careful cable ties prevent severe cable bending
Scope of use
Crane and transport machinery
For elevators and transport facilities
Machine building
Not suitable for applications in explosive environments
Notice
Round- and flat cables are not allowed to be combined side by side or below each other
Do not mount more than three round cable clamps one underneath the other
Radius of curvature on the bracket corresponds to the value of a fixed installation
Product composition
The installation of a system depends on various criteria, for example: maximum cable drop (weight of the cable) and

working duration.
