Additional Product Information

Overview

This Category 6 U/UTP twisted 4-pair cable supports data transmission in a structured cabling system.

description

At the time of the development of connected solutions, the increasing transmission of data, the multiplication of networks, the need for higher speeds demands increasingly reliable, secure and efficient digital infrastructures. To meet these needs, Legrand has developed LCS³, the new digital infrastructure system with VDI solutions for copper up to 40 Gbit/s and fibre optics up to 100 Gbit/s. Easy to deploy, fast and tool-free, they facilitate maintenance and are suitable for the most critical sites thanks to their modularity and network performance. With a 25-year warranty, LCS³ is suitable for small and medium-sized tertiary works (small shops, schools, etc.) as well as for large tertiary works (office buildings, leisure parks, large shopping malls, stadiums, sports facilities, etc.), and meets the requirements of sensitive sites with a maximum level of criticality (hospitals, airports).specifications
