Additional Product Information

Product features

(you do not have technical specifications) General characteristics

D-POS provides to the residential spaces free from bonds by which the elderly may be wandering. The technology G-POS allows you to configure a number of steps determined, authorizing or denying access to residents on the basis of their profile. The resident will take a bracelet in which is set the policy of access (allowed or denied). When the resident access by a step-constrained the system will throw an alarm that alerts you to the professionals. The system allows you to know what a person is and what access is by crossing, being able to act very effectively.
