The series HRP are the sources of most high-end format box MEAN WELL. Are designed for demanding applications.

Support input voltages of 300Vca for 5 seconds and use components of the highest reliability as the electrolytic capacitors of 105°C.

The protection against over loads is for current limiting, constant current, and can reduce stress by up to 50% of its nominal value and keeping the output intensity, this serves to start heavy loads such as motors or other inductive loads or capacitive.
