Additional Product Information

The V-TEC TB.. ensures - like all V-TEC glands - a secure sealing of the cable.

The fact that the cable gland is separable means that it is easy and quick to install for instance pre-terminated cables. A further benefit is the option of retrofitting cables in existing installations. It is also unbeatable as a "repair gland", there is no need of disassembling pre-mounted cables, it can be installed without interrupting the production process.
