Additional Product Information

FeaturesLVS-9570 Wide Area Barcode Verifier

The LVS-9570 is a 1D and 2D handheld barcode verifier designed for off-line verification of 1D and 2D barcodes to ISO/IEC standards. The LVS-9570 offers ease of use and the ability to verify linear (1D) and two-dimensional (2D) barcodes using a lightweight, handheld verifier.

Barcode labels can be verified while on a flat surface, including barcode labels on corrugated cardboard boxes, shipping containers, or on a web. The LVS-9570 is a line scan, camera-based system. An image of the barcode label is generated by placing the LVS-9570 flat onto the surface of a barcode label and scanning through the barcode label in either a ladder (left to right) or picket fence (top to bottom) orientation.

Verify long barcodes without the need for stitching.

Lightweight and portable system

Verifies 1D barcodes up to 203.2 mm in length

Overall scanning width 137.16mm
