Additional Product Information

Oil-resistive, compact photoelectric sensor in metal housing

E3S-C

Features

Meets IP67/IP67G (oil tight) and NEMA 6P standards water/oil resistance

E3S-C meets the IP67 requirements of the IEC standards and

6P of the NEMA standards. E3S-C can be used worry-free in automotive assembly lines and other production lines where oil vapor exists. It can also be applied to food processing lines because it resists hydrogen peroxide, detergent and potassium hydroxide.

High shock resistance of 1,000 m/s²

The industry's top-class photoelectric sensor features shock resistance of 1,000 m/s², which is as high as that of a proximity sensor at rated values, and vibration resistance of as high as 10 to 2,000 Hz.

Lineup of M12 metal connector joint type models Lineup of water/oil/shock-resistant M12 metal connector joint type models

are available. This series ensures ease of sensor replacement during maintenance.

NPN/PNP output selector

The operation panel has the NPN/PNP output selector. You need not prepare two NPN and PNP models for export. You need not worry about malfunctions due to noise, either.

Mutual interference prevention enhanced (Retroreflective, diffuse reflective models) Fuzzy inference is introduced into the mutual interference pre-

vention for the first time in the industry. This prevents a malfunction due to mutual interference, enabling two sensors to be mounted closely side by side.

Easy optical axis alignment
